

Why Select DAKCS Software Systems for Your Accounts Receivable Management Solution?

We provide our clients with a big picture approach. We don't simply sell software. We recognize that each company is unique with their own special needs and requirements. We work closely with our clients to understand their business issues and concerns; we develop unique business solutions custom designed for them. Whether the client is a large agency or a small legal office, we will provide a total package that will meet and exceed expectations. Not only do we market an award winning windows based collection software package but we also offer an integrated dialer/IVR, a remote client access system, an integrated payment processing system, a highly respected legal package...just to name a few. Furthermore, we pride ourselves in our long-standing partnerships with top industry experts who support our clients with first class options for skip tracing, letter services etc.

The bottom line is simple. We are first class problem solvers who provide our clients with a one stop shopping option: the **DAKCS** solution. Call our team of experts to learn more about the **DAKCS** Solution. We have been leaders in the industry for over twenty years. Let us show you how to achieve "peak performance" today.

ASCENT: The Small Business Software Solution

Are you faced with the task of selecting collection software for your new business? Are you overwhelmed by the options available and struggling through the complicated collection industry maze? After all, this software decision may be the most significant

choice you make in determining your ultimate business success. The search is over.

DAKCS Software Systems has the answer! **ASCENT**: the small agency collection software solution provides a complete and robust debt collections package at a price that simply can't be beat!!

At **DAKCS**, we simplify the process and help clients understand their options while working within the confines of their established budgets. The **ASCENT** product was designed to help you grow your business and as you grow, **ASCENT** will grow with you. No costly upgrades! We can easily increase your work stations and add innovative enhancements such as an integrated predictive dialer and IVR whenever you are ready!

ASCENT provides you with the **DAKCS** award winning **Beyond.net** collection software product

customized to meet your needs! Designed with a flexible and user friendly GUI interface, the **ASCENT** solution includes a central control point and management tool, The Cockpit, which allows clients easy access to primary statistical data about clients, collectors, sales and internal data...all in one place and on a real time basis.

According to Lex Patterson, President of **DAKCS**, *"We have done extensive research on the rapidly growing small business ARM market. As a result, we recognized a serious need in the industry for a product that is designed and priced specifically to meet small agency expectations. We believe that the new DAKCS ASCENT product fits the bill perfectly. We specialize in providing a total debt collection package that allows easy access to the client's data with the flexibility to perform many tasks independently, without the need for costly programming assistance."*

The DAKCS Solution for Climbing the Ladder of Success

ASCENT is an effective and simple business solution that provides users with what they want when they want it...an outstanding feature rich design that includes:

- **DAKCS'** Beyond.net collection software (Server based/UNIX/LINUX/IMS Database)
